

## **NOTICE TO PYRAMID FUNDS CORPORATION CUSTOMERS IDENTIFICATION PROCEDURES**

Due to recent government regulations that went into effect on October 1, 2003, we are required to inform all investors of the following:

To help the government fight the funding of terrorism and money laundering activities, Federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account.

**What this means to you:** When you open an account, our firm is required to ask your name, address, date of birth, and identification number\*

- U.S Citizen: taxpayer identification number (social security number or employer identification number)
- Non-U.S. Citizen: taxpayer identification number, passport number, and country of issuance, alien identification card number, or government-issued identification showing nationality, residence, and a photograph of you.

You will also need to show your driver's license or other identifying documents.

A corporation, partnership, trust or other legal entity may need to provide other information, such as its principal place of business, local office, employer identification number, certified articles of incorporation, government-issued business license, a partnership agreement, or a trust agreement.

U.S. Department of the Treasury, Securities and Exchange Commission, NASD, and New York Stock Exchange rules already require you to provide most of this information. These rules also may require you to provide additional information, such as your net worth, annual income, occupation, employment information, investment experience and objectives, and risk tolerance.

### **What happens if I don't provide the information requested or my identity cannot be verified?**

Our firm may not be able to open an account or carry out transactions for you, they may have to close it.

We thank you for your patience and hope that you will support the financial industry's efforts to deny terrorists and money launderers access to America's financial system.
